CAREER OBJECTIVE:

DevOps Engineer with 3.6 years of IT experience in **Azure DevOps, CI/CD implementation,** and **Infrastructure as Code** (IaC). Skilled in automation, **cloud deployments**, and container orchestration using **Docker** and **Kubernetes**. Proven ability to streamline delivery pipelines and manage scalable infrastructure. Seeking a challenging role to contribute my technical expertise while continuing to grow professionally.

PROFESSIONAL SUMMARY:

- 3+ years of experience in **Azure DevOps**, automation, CI/CD pipelines, and release management.
- Proficient in **Terraform, PowerShell scripting**, and ARM templates to automate Azure resource provisioning.
- Experience building and maintaining **CI/CD pipelines** using Azure DevOps and Git for .NET and UI-based applications.
- Strong understanding of **Git branching strategies**, **release workflows**, and **infrastructure version control**.
- Implemented **containerization** using Docker and orchestrated deployments on **Kubernetes clusters**.
- Deployed microservices to AKS using pipelines integrated with private Docker registries.
- Knowledge of **Azure networking, NSGs, Backups**, and **Disaster Recovery Services.**
- Skilled in monitoring and ensuring production environment stability through automated deployments.

TECHNICAL SKILLS:

• Operating Systems	:	Linux, Windows
• Cloud Technology	:	Microsoft Azure (IAAS, PAAS)
• DevOps Tools	:	Azure DevOps, GIT, ARM Templates
• Cloud Security	:	Azure Network Security Group’s
• Web Server	:	Apache Tomcat Server
• Build Tools	:	MS Build
• Version Control	:	Git, and GitHub
• Container Tools	:	Docker, Kubernetes
• Cloud Technologies	:	Azure
• Tools	:	WinSCP, Eclipse, Jira, Terraform
• Scripting Languages	:	Power Shell scripting,
• Data base	:	MySQL

PROFESSIONAL EXPERIENCE:

DevOps Engineer – Tata Consultancy Services (TCS)
June 2024 – Present

- Designed and managed Azure DevOps pipelines for multiple .NET and Java-based applications.
- Automated infrastructure deployment using **Terraform** and **ARM templates** in Azure.
- Deployed containerized apps into **AKS** with zero-downtime rollouts and Helm charts.

Firmware Engineer – G-Sky Co., Ltd.
November 2021 – May 2024

- Worked closely with DevOps to streamline firmware deployment and CI processes.
- Gained hands-on experience with version control and automated builds.

PROJECTS :

1 Insurance Management System
Client: J C Penny | **Role**: DevOps Engineer | **Environment**: Jenkins, Maven, Git, Tomcat, SonarQube, Azure

Project Description: -

J C Penny is one of the largest chains of department stores owned by American multinational corporation J C Penny online Inc. It operates 40+ locations in the United States. J C penny online retail store provides its customer to order wide variety of online shopping services. It also has customer support where you can track the status of your consignment, Shipping information and returns.

Responsibility:

- Integrated Apache Maven with Jenkins for the builds to achieve Continuous Integration process.
- Creating the build jobs in Jenkins for all releases.
- Resolving the build issues.
- Involve in Deployment of application using apache tomcat server.
- Manage Git Branching strategy for applications by creating Release branches, Development branches to ensure the integrity of the code.
- Administer git which include granting user access, admin activities and upgrading Git.
- Responsible for all git related issues.
- Prepared Build and Release, Deployment guide documents.
- Involved in build/Release management and carried out the quality product in UAT and Production.

2. Azure Cloud Infrastructure Automation
Client: Global Retail Solutions **| Role:** DevOps Engineer **| Environment**: Azure, Azure DevOps, Terraform, PowerShell, Docker, AKS

Project Description:
Automated the entire Azure infrastructure setup for a global retail client's e-commerce platform. Integrated Terraform modules with Azure DevOps pipelines for provisioning. Implemented CI/CD for microservices hosted on AKS.

Responsibilities:
- Created reusable Terraform modules for provisioning VMs, VNets, NSGs, and Storage Accounts.
- Developed PowerShell scripts to generate parameter files dynamically.
- Managed CI/CD pipelines using Azure DevOps for .NET microservices.
- Integrated pipelines with Docker registry and AKS deployments using Helm.
- Monitored rollout progress and implemented rollback strategies in case of failure.
- Used Key Vault for secrets management and secure configurations.

EDUCATION:

- **Masters in Computer Science and Information Engineering.**
  Asia University, Taiwan. [September 2019-2021]

- **Bachelor of Technology in Electronics and Communication Engineering**
  Sai Tirumala NVR Engineering College, India. [July 2015 – May 2019]
